

## New lines join Ridgway cast

Ridgway Optical Supplies has extended its in-house range of frames with the release of the Reaction product line.

It said that the new models were highly fashionable and most were made from stainless steel, with intricate laser-cut temples. Pictured is the stainless steel RA2220 women's frame with patterned temples in two shades of purple (1).

Ridgway has also signed a distribution deal with Fysh UK and Kliik Denmark. It said that the Fysh collections were inspired by the beauty and freedom of the sea, with distinctive colours and creative textures.
